

## PRE-DELIVERY CHECKLIST (Dealers Responsibility)

Inspect implement thoroughly after assembly to be certain it is set up properly before delivering it to the customer. The following checklist is a reminder of points to inspect. Check off each item as it is found satisfactory either before or after corrections or services performed.

Check all bolts and nuts to be sure that they are tight

Check PTO series is correct and that the PTO is the correct length

### **▲ IMPORTANT**

**Gearbox was not filled with oil at the factory. It must be serviced before implement is operated. Failure to service will result in damage to the gearbox. You will find a level plug on the side of your gearbox or a guide to the amount of oil required can be found on the same page as the gearbox parts guide.**

Check gearbox is properly serviced and seals are in good condition.

Refer to Operators Manual and lubricate implement.

Check that blades have been properly installed.

Show customer how to make adjustments to belts, chains, implement height, etc.

Explain the importance of lubrication to the customer and point out all the lubrication points on the implement.

Point out the safety features and decal and explain why decals and safety features fitted should never be removed when operating.

Ensure the stability of the tractor has not been compromised with the implement the customer has purchased. Remember a minimum 20% of tractor and equipment gross weight must be on the tractor's front wheels with implement in the transport position. If you are adding weight to the tractor to attain the 20%, you must not exceed the ROPS max ballasted mass certificate. Weight the tractor and implement. Do not estimate.

Give Operators Manual to the customer and recommend that customer become familiar with all sections, especially the safety and safe operating procedures.

Explain to the customer that when transporting the implement on roads or highways, day or night, safety devices should be used to provide adequate warning to operators of other vehicles. Also explain the operator must ensure that the tractor and implement complies with current State and Federal laws and must strictly adhere to all road traffic regulations in force in his/her particular state.

Ensure the customer has signed the **WARRANTY REGISTRATION & INSTALLATION FORM** and a copy has been returned to Caroni Implements P/L, 16 Cahill Street, Dandenong, Victoria, 3175.

I have been fully instructed in the operation of this unit in the actual working conditions that I intended to operate and I am satisfied that I can use it safely. I acknowledge that I have been fully instructed in the care, maintenance, lubrication and that the implement I have purchased was designed for use on agricultural properties away from people, animals, roads and property. I understand that should I wish to operate in any populated areas that I must abide by local and federal laws and I must inspect the area and remove any foreign objects before commencing operations. I have received a copy of the operating manual and the dealer has instructed me to read the manual in full before commencing any operations.

Owner's Signature.      Date

- FINAL ASSEMBLY** – Checked all hardware to ensure it is firmly tightened as outlined in the Operators Manual. Customer has been instructed on how to make regular checks and tighten ALL hardware.
- LUBRICATION** – The implement has been lubricated and oil levels have been checked in all chain/gearbox transmissions. Customer has been instructed on how to check oil levels and lubricate implement.
- GREASING & MAINTENANCE** – Grease bearings, universals and ensure PTO shaft has been. Instruct customer how to re-grease the implement. Explain to the operator the requirements and repercussions of regular maintenance.
- IMPLEMENT, DRIVESHAFT & TRACTOR COMPATIBILITY** – Check implement and PTO compatibility, ensuring the PTO will not foul on the tractor or implement during linkage operation. If PTO was cut make sure that it was re-greased and all spring activated locking pins on the PTO Shaft move freely.
- CLUTCH ADJUSTMENT** – Check that clutch has been correctly fitted and nuts are tight. Check the clutch has been adjusted for the customer's situation. Instruct customer that an annual service is required.
- OPERATION PROCEDURES** – Instruct the operator on correct procedures and techniques for the type of work they have indicated they intend to carry out. General safe operating procedures can be found in the Operators Manual. Advise customer to carry out a risk assessment and hazard identification of the property and alert the customer to the type of potential dangers they should be looking to avoid.
- SHIELDING** – Instruct the customer that if they wish to operate the implement along roads, pathways or in populated areas near people, animals or vehicles that they MUST purchase optional rubber or chain shielding which is designed to reduce the possibility of objects being thrown.
- DANGERS** – Instruct customer on the potential dangers of operating the implement. Outline the dangers associated with rotating blades, the possibility of fast moving debris, rotating PTO Shaft and ensure the customer knows that information about safe operating procedures and maintenance are in this Manual.
- OWNERS/OPERATORS MANUAL** – Check that the implement has a booklet supplied. Emphasize the importance of reading the Manual. Note manuals can be down loaded from [www.farmimplements.com.au](http://www.farmimplements.com.au)
